

AIRPORT SUSTAINABILITY INFLUENCE CONTOURS

How airports can provide community, citywide and national leadership on sustainability

With nearly 4,000 commercial airports around the world supporting over six million on-site jobs, airports can strongly influence surrounding businesses, communities, cities and countries across a range of sustainability advancements:

- new energy options
- sustainable purchasing
- better transport access options - to the airport as well as surrounding areas
- supporting community engagement
- social and economic improvement
